

Chiropractic Care for Your Newborn

Langford
& Karls
CHIROPRACTIC
YOUR FOUNDATION FOR HEALTH

Why Chiropractic after Delivery?

Delivery can be traumatic for a baby!
Especially if:

- Delivery was very fast
- Hard delivery
- Long labor
- C-section (especially emergency)
- Misshapen or cone head
- Stuck in birth canal
- Induced labor
- History of low back pain or injury in mother

Signs your baby may need Chiropractic Care:

- Colic
- Fussiness
- Turning head to one side more than the other
- Latching issues or side preference
- Increased arch in back while changing
- Constipation
- Vomiting/excess spit up
- Sleep difficulty
- Flat spot on head
- Ear infections

Just as it is important for your children to have their teeth checked by a dentist, it is also important to have their spine evaluated by a chiropractor to ensure they are developing correctly. It is never too soon to have your child checked; it could save them from potential problems later in life!

Our Office **LOVES** caring for children of all ages. Make your appointment!

730 Cleveland Avenue S.

St. Paul, MN 55124

 **651-699-8610**
